

SATT (SPECIAL ADVANCED TACTICAL TRAINING)

\$1,359 PER STUDENT

BLOCK 12 – HELO OPS. – AIR LAND/FAST ROPE/RAPPELLING

SATT Block 12 focuses on Helo Operations and Alternate Infill & Exfill (AIE) methods. Alternate Infill & Exfill methods include the capabilities, employment, execution and qualification training of Fast Roping, Rappelling and Air-land operations conducted from rotary wing aircraft. Students will receive hands-on training with the FRIES system and Rappelling techniques from a tower with combat loads prior to conducting live-fly training. All training is conducted with approved methods and standard procedures prescribed in USSOCOM M 350-6 for joint interoperability. Students will be task-qualified to routinely and safely perform AIE methods during mission-integration training and possess the capabilities to conduct and maintain sustainment training requirements.

TRAINING & CONCEPTS COVERED:

- ✓ Tower & Range Safety
- ✓ Equipment, Gear and Accessories
- ✓ Rigging, Inspection & Maintenance
- ✓ Insertion Airframes & Specs.
- ✓ Personal Equipment & Accessories
- ✓ Duties & Responsibilities
- ✓ Commands, Calls & Hand/Arm Signals
- ✓ Equipment Lowering Procedures
- ✓ Mission Planning
- ✓ Tactical Employment TTPs & SOPs
- ✓ Tactical Execution TTPs & SOPs
- ✓ Briefing & Rehearsal Checklist
- ✓ Emergency Procedures
- ✓ HLZ Selection & HLZ Brief
- ✓ HLZ Operations TTPs & SOPs
- ✓ Low-light/No-light TTPs & SOPs
- ✓ PCC/PCI Checklist
- ✓ Advanced TTPs & SOPs

- Helo Operations**
- Fast Roping**
- Rappelling**
- Airland**
- HLZ Operations**
